ZHIYU XUE

Dear Adobe,

I am an interaction design student at California College of the Arts. I found this User Experience Design internship on Adobe's website, and I was very interested in the position at Adobe. CCA focuses on teaching their Interaction Design students user experience and user research, so I am very familiar with UX design processes such as interviewing users, making journey maps and ideating for the future state. I am good at storyboarding with constructed personas.

When I was attending sophomore year, I researched the Security of Transgender people with my teammates, a very sensitive topic. However, we successfully came up with insights that identified their needs and real situations. We interviewed 5 people and performed secondary research. We mapped out interviewees' situations based on our interview.

If Adobe accepts me as part of the internship program, I would love to push myself to help Adobe become more successful and I will be open to any feedback. I love direct feedback that points out what I need to work on in order to push myself further.
